

Python Assignment 10.

①

A1 ① `shutil.copy()` \Rightarrow It will copy the content of the file only

② `shutil.copytree()` \Rightarrow It will copy entire folder with its whole content as it is.

A2 • `rename()` method.

A3 As the ~~name~~ name suggests :-

① `send2trash` \Rightarrow function will delete the file and send it to recycle bin.

② `shutil` \Rightarrow Module will delete the file permanently.

A4 • `ZipFile()` function is equivalent to `open()` function.

②

AS

import as
import shutil
