

Assignment - 6 Python.

①

A1 Escape sequence characters are:-
① \n \Rightarrow for new line
② \t \Rightarrow for tab space

A2 n \Rightarrow new line
t \Rightarrow tab space

A3 in a string & single backslash (\) is not loaded, to make backslash print we have to print it ~~twice~~ ^{output} twice (\\)
print("Hello \ world") \Rightarrow Hello world
print("Hello \\ world") \Rightarrow Hello \ world.

A4 Escape sequences are triggered only after backslash (\), single quote (') is not considered as one.

A5 For this we may use different print statements

A6

① ello, world!

Hello, world!
0 1 2 3 4 5 6 7 8 9 10 11

②

② Hello

③ ~~Hello~~ Hello

④ lo, world!

A7

① HELLO

② True

③ hello

A8

① ['Remember', ' ', 'remember', ' ', 'the', 'fifth', 'of', 'July']

② There-can-only-one.

A9

① Right Justifying \Rightarrow .rjust()

② Left Justifying \Rightarrow .ljust()

③ Centering \Rightarrow .center()

A10

~~print (start = "", 'test Here')~~

A10

.strip() \Rightarrow Method is used strip all the white space present in the start and in the end.
